Dear Retailer:

Radical is excited to introduce two balls that **Mo Pinel** had been working on before his passing. The **Trail Blazer**, appropriately named since we all know what a trailblazer Mo was. The **Trail Blazer** is a Top-Shelf launch featuring a strong performing asymmetrical core and the new **MOtion Magic** cover stock. The second launch, the **Pay Back**, features a new Mo design and is a medium differential symmetrical core using the **Ai27 Pearl Plus** cover. Both balls have the hard-hitting **DynamiCore** to assure the increased striking power our Radical Fans are accustomed to seeing.

The Trail Blazer features a new design concept that Mo had been working on for a few years. This new design has an Rg of 2.48 with a differential of .052 and an intermediate differential of .020. The coverstock is strong, and is finished with 500-1000-1500 Siaair pads and compound. The new **MOtion Magic** cover creates our largest footprint on the lane. This combination of core and cover creates plenty of hook, backend motion, and tons of continuation.

The Pay Back is a benchmark addition to the **Radical** symmetrical line-up. This new Mo core design has an Rg of 2.52 and a differential of .041 and is wrapped with the **Ai27 Pearl Plus**. This cover core combination fills a gap in our symmetrical line, creating more mid-lane motion than the Bonus line and more backend than the Intel line.

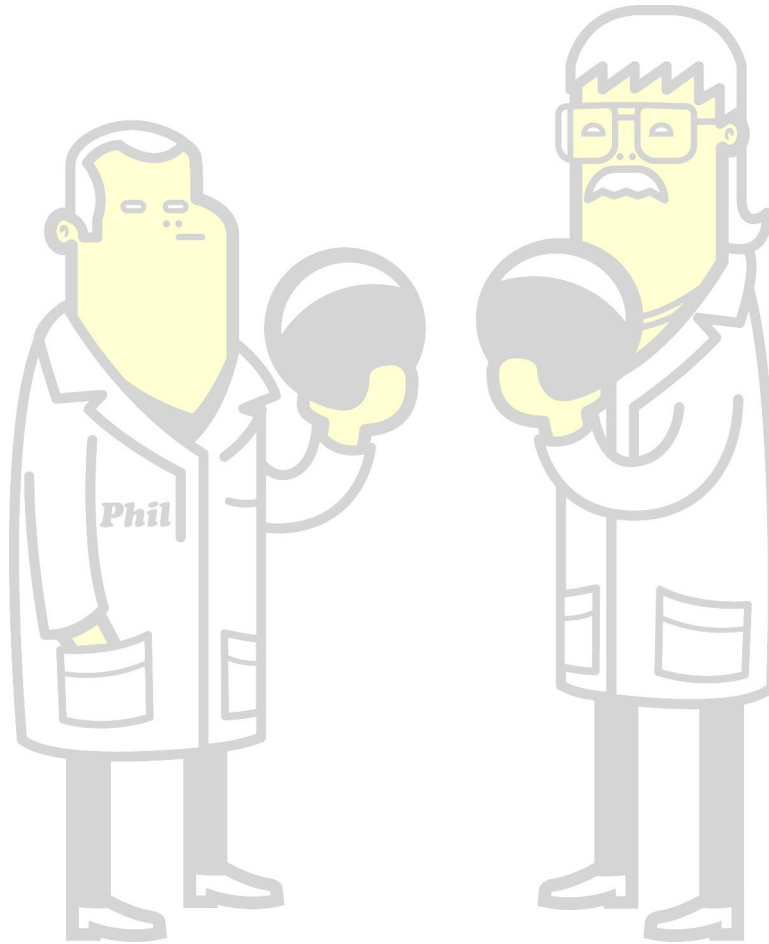

With our new ball launches, we are featuring new drilling instructions offering a wide variety of ball motion with "no balance hole" options so that bowlers can make a smoother transition into the new ball specifications. Again, this is just another example of why Radical is quickly becoming a leader in bowling ball technology. We call it the **#Radical Revolution**.

At Radical Bowling Technologies, innovation is our commitment. We deliver high-tech, high-quality products for the betterment of the game ...Wow! That's Radical!

Regards,
Phil Cardinale
